

# Photographic Processor Problem Solver

Problem	Where Found	Effect on Work	Solution
<b>Algae/Bio-slime in Stabiliser solution</b>	Stabiliser or Replenisher Tanks. Mini-lab wash-less systems	Marked prints, unstable solution, holes in negatives, slipping/jamming of rollers, evil smell, stabiliser going milky/stringy.	<b>ALGAE FREE/HD</b> Hand Dosing
<b>Algae/Bio-slime in Wash Tanks</b>	Processors with wash tanks connected to mains water supply	Blemishes/hand washing, holes in negatives, rollers slipping/jamming, evil smell, tramlines, slimy dirty rinse/wash tank water	<b>ADE 24 &amp; ALGAE FREE/AD</b> — Automatic Dosing <b>ALGAE FREE/HD</b> — Manual Dosing
<b>Developer Tar &amp; Stain Build-up</b>	Developer tanks, racks, rollers, mixing vessels, sinks, hard surfaces	Tramlines, dirty work, cogs/paper slipping/jamming of rollers, short developer life	<b>SPRINT</b> Deep tar remover foaming spray
<b>Ingrained Tar &amp; Chemical Scale, Fix/Bleach &amp; Water Scale Build-up</b>	All chemical tanks, both wash and wash-less	Tramlines, dirty work, cogs/paper slipping/jamming of rollers, scratched film/print, deep staining	<b>BLITZ</b> Total machine cleaner, descaler, refurbisher foaming spray <b>N.B. Not Sulphur</b>
<b>Wash Tanks need Sterilising prior to ADE 24 installation</b>	Wash tanks	Deep staining of socks, rollers, blankets in wash tanks, ingrained algae	<b>BLITZ</b> Sterilizer Cleaner
<b>Silver Build-up</b>	Fix/Bleach rollers and tanks, occasionally in 1st developer/1st wash tank	Scratches/flakes on finished work, rollers slipping/jamming, silver tramlines	<b>FURY</b> Silver Remover
<b>Mineral/Water Scale build-up, very heavy dried Algae Scale build-up</b>	Wash tanks	Scratches, cogs jamming, blocked pipes, water running cool, hardened socks	<b>BLITZ</b> Scale Remover
<b>Yearly Deep Clean</b>	All wash and chemical tanks	Brings tanks, racks, pumps and tubing to as new condition	<b>ZX-100</b> Heavy Duty Cleaner

<b>Problem</b>	<b>Where Found</b>	<b>Effect on Work</b>	<b>Solution</b>
<b>Marks/Dust on Negatives &amp; Films</b>	Stabiliser/Final Rinse tanks	Drying marks on film, dust/lint particles attracted to surface	<b>HYDRA REPEL</b> Wetting and anti-static additive
<b>Marks/Dust on Negatives &amp; Films Stabilizer going bad</b>	Stabiliser/Final Rinse tanks	Drying marks on film, dust/lint particles attracted to Surface plus contains Algae Free to prevent stabiliser solution from going off (bad smell, black bits in solution)	<b>HYDRA MAX</b> Wetting, anti-static and anti-algae cleaner additive
<b>Marks/Dust on Negatives &amp; Films</b>	On negatives and film	Removes marks, dust, finger prints etc	<b>HYDRA ZEBRA CLEAN</b> Anti-static film and negative cleaner
<b>Marks and Dust</b>	On lenses, mirrors, vdu screens, photo copiers and all other hard surfaces	Removes marks, dust, finger prints etc leaves an anti-static finish to repel dust	<b>GLITTER</b> Anti-static glass and surface cleaner
<b>Chemically Stained, Cracked or Damaged Skin</b>	Personal with sensitive skin handling chemicals, cuts, grazes etc	Gently restores and moisturise whilst it cleans, promotes fast healing of cuts, grazes and skin related diseases	<b>ZETA GOLD</b> Anti-static glass and surface cleaner
<b>Chemical spills to skin</b>	In case of accident	Contains buffering agents to protect against damage to skin, effective on both acids and alkalis	<b>NEUTRACARE</b> Anti-static glass and surface cleaner
