

# Latest Processor & Lab Cleaners

## Hydra's Range of Specialised Processor, Lab Cleaners

### Bio Slime Eliminators

For all Film & Paper Processors & Mini-Lab Stabilizer Systems

#### Hydra Algae Free/HD

**Hand Dosing System-For Mini-labs and Pro-labs**

Removes bio-slime and prevents re-growth from all Paper, Film & Plate wash processors. Use in Mini-Labs to stop stabilizers going off (bad egg smell) or emulsifying. Multi-action cleaning agents rapidly remove even the most stubborn build-up of bio-slime from Racks, Rollers, Spray Bars, Tanks and the 1st wash tank between chemistry on E6 & C41

#### Hydra Algae FreeA/D ADE24 Automatic in-line system

**Automatic Dosing System-For all Paper and Film processor Wash Tanks**

Injects **Algae Free/AD** directly into the water supply feeding the wash tanks of your processor. Suitable for all makes and types of film and paper wash processors including 1st wash tanks between chemistry in E6 and reversal processing. Keeps tanks, rack & rollers clean & free running-Automatically.

- **Stops** slipping & Jamming of rollers. **Stops** wastage of paper or film.
- **Stops** flooding caused by slime build-up in outlet pipe work & drains.
- **Stops** expensive down time with active cleaners stop the growth & re-growth of bio-slime and are safe to be left in the tanks 24 hours a day.

The photograph above, shows the compact, easy to fit, **Hydra ADE 24** system together with 5 liter container of **Algae Free/AD** and stainless steel holding cradle. Fit Hydras' **Algae Free A/D** automatic system and forget wash tank problems.

### New Stabilizer Additives From Hydra

For E6 C41 Black & White Final Rinse/Stabilizer Tanks Plus Mini-Lab Stabilizers
